Dear Readers and Authors,

I am pleased to bring you Volume 15, Issue 4 of Pharmacognosy Communications. In this issue, we present an evaluation of the antibacterial activity of *Tasmannia lanceolata* (Poir.) A.C.Sm. Extracts against *Streptococcus pyogenes*. We also present a study examining the growth inhibitory effects of *Tasmannia insipida* R.Br. ex DC. Leaf extracts against the *Acne vulgaris* causing bacterium *Cutibacterium acnes*. Additionally, we present another study examining the anticancer effects of several high antioxidant plant extracts (*Davidsonia pruriens*, *Elaeocarpus angustifolia*, *Kunzea pomifera*, *Podocarpus elatus* and *Acronychia acidula* fruit extracts) by screening their antiproliferative activity against HeLa (human cervical cancer) and Caco2 (colorectal cancer) cells.

Our regular features are also continued in this issue. Two more high quality medicinal plant images are also included in this issue and a listing of upcoming conferences and meetings is also included. I encourage any conference organisers who would like to publicise their event to contact me with details so they can be included in future upcoming events sections of this journal. I look forward to bringing you the next issue of Pharmacognosy Communications in 3 months' time. Keep submitting your quality research manuscripts and reviews and also consider becoming involved/submitting to the other sections (Janus Corner, Medicinal Plant Images etc.) of the journal. On behalf of the editorial board, we look forward to bringing you the next issue of Pharmacognosy Communications in 3 months' time.
